

**"Natural Aid" worked well even where ART failed.**

1. A patient age 38 years, weight 43kg **"became semi-conscious on taking ART"** and symptoms like constipation, bleeding, ATT ( for TB), fever, tiredness, Nausea and vomiting, Severe fungal infection in mouth and **highly critical case because patient was having tendency to bite the people around when somebody touch her. She was brought to us tied with rope by her relatives.**

Within 15 days of starting our medicine patient returned to awareness became conscious fully, started talking and recognizing people around, liquid diet started, constipation relieved and is leading normal life now.
